### A TENSION ADJUSTMENT

Increase or decrease to match body weight. Allows you to rock comfortably, without heavy pushing, reducing muscle fatigue.

### B CHAIR TILT LOCK

Lock the tilt movement in position(s) to accommodate your working posture. Allows you to lock your chair in a comfortable and supportive position. (can be either single position or infinite style).

### C SEAT HEIGHT

Raise or lower to allow your feet to rest flat on the floor. Avoids pressure under your thighs, easing blood flow.

### D BACK HEIGHT

Raise or lower to position lumbar support in your lumbar area. Reduces likelihood of back pain.

### E SEAT DEPTH

Change the depth of the seat to accommodate the length of your thighs. Keeps your back in contact with the backrest while avoiding pressure behind your knees.

### F FORWARD SEAT ANGLE

Allows chair to tilt forward changing the angle of your thighs in relation to the floor. Helps reduce disc pressure during forward leaning tasks.

### G BACK ANGLE

Adjust to change the angle of your torso in relation to your thighs. Helps reduce disc pressure and relaxes your back muscles.

### H ARM HEIGHT

Raise or lower to support your forearms. Reduces muscular effort in neck and shoulders, minimizing risk of pain.

### J KNEE-TILT MOVEMENT

Chair tilts from a pivot point at the front of the seat, keeping your feet on floor as you rock. Maintains stability while enhancing blood flow.

### L SYNCHRO-TILT MOVEMENT

Backrest reclines at a faster rate than the seat, increasing the angle between your torso and thighs. Enhances comfort and encourages dynamic body movement.

### M WATERFALL SEAT EDGE

Reduces pressure at the back of the knee, contributing to good blood flow.

### N PROPERLY CONTOURED CUSHIONS

Support the body effectively, allowing you to sit longer without discomfort.

### Q WIDTH ADJUSTABLE ARMS

Allows outward movement of armrests to match shoulder breadth. Ensures armrests properly support forearms, reducing muscular effort in neck and shoulders.

### R ARM ROTATION

Rotate armcap to support your forearm in various positions. Reduces muscular effort in neck and shoulders, minimizing risk of pain.

### S CENTER-TILT MOVEMENT

Chair tilts from a pivot point under the center of the seat allowing you to rock. When your feet are well supported, blood flow is enhanced.

### T PUSH BUTTON

Push to activate control. Location within reach increases your adjustment. Promotes good posture as you move to various positions.

**The Global Group firmly believes ergonomics plays a vital role contributing to health and wellness in today's diverse workplace and that it is an integral part of corporate success.**

#### In support of this belief, Global:

Became the first Corporate Member of the Association of Canadian Ergonomists (ACE) in 2001. ACE is the voice of ergonomics in Canada and believes that high quality ergonomics is good for business and good for people. On an on-going basis Global partners with ACE to contribute to the development and promotion of ergonomics in Canada.

Global employs a certified professional ergonomist who:

- Provides advice and guidance to The Global Group throughout product life cycle.
- Serves as an ergonomics resource to client.

Global strives to design products that:

- Fit the intended users.
- Promote personal comfort and enhance performance while minimizing the risk of injury.
- Keep pace with the rapid development of technologies and quickly changing aspects of the workplace.

Global continually provides customers with up-to-date practical ergonomics information and educational opportunities.

Don't worry. We've got you covered.

Think Global. Think Green.

**A LIFETIME OF VALUE THAT'S ALWAYS IN STYLE.**

We have you covered so you can enjoy your purchase without worrying about future quality issues. Global warrants that all commercial products are free from defects in material and workmanship, for the life of the product, to the original purchaser. Global will repair or replace, at Global's option, as the sole remedy for any defect covered by the warranty.

**WHAT'S COVERED UNDER THE GLOBAL LIFETIME WARRANTY?**

Global's Lifetime Warranty covers manufacturer defects for seating, desks, tables, panels, metal storage and filing... everything you would need in a contract work environment covered for the life of the product.

**NO WORRIES** on plastic components, casters, glides, pneumatic cylinders, arm structures, arm caps and bases.

**NO WORRIES** on drawer slides, trays, locks, keys, metal legs and grommets.

**NO WORRIES** on panel frames, edges and work surfaces.

*For complete details, visit the Global website and refer to the dedicated Warranty section.*

Global has the products and resources to help your projects achieve LEED certification.

New technology allows us to reduce glue usage by 50%. In addition, our water based glue reduces emissions and requires less energy to apply.

Epoxy powder coating process is solvent free. No harmful VOC's or lead. No toxins are released into the atmosphere.

Global's recycled fabrics offer affordable, environmentally responsible alternatives to commercial textiles. We recycle 35,000 lbs. of fabric offcuts weekly.

**THE ENVIRONMENT** We believe now more than ever, that it is our responsibility to protect the environment and our precious natural resources for future generations. The growing importance of energy and environmental concerns continues to challenge us in this ever changing marketplace.

As an industry leader, Global continues to take proactive steps towards reducing the negative impacts on the environment. We are building "healthier" offices; investing in Research & Development and new technologies; reducing waste and the consumption of energy; and improving the quality of the air we breathe, all which can have a significant impact on our quality of life.

level™ certification, based on the ANSI/BIFMA e3-2010 furniture sustainability standard, sets furniture manufacturers on a path toward greater sustainability over time. Based on environmental and social criteria set forth in the standard, a product’s entire supply chain is assessed.

Certification assessment includes an evaluation of specific corporate policies and guidelines and an assessment of associated company manufacturing facilities. Products must meet quantifiable milestones of environmental and social performance at every step of development.

The quantitative assessment addresses four categories: material use, energy and atmosphere impacts, human and ecosystem health and social responsibility.

Manufacturers earn points in each of the four categories. The level™ brand and its numeric rating of 1, 2 or 3 indicate what threshold of certification a product has achieved. level™ 3 is the highest rating.

ISO 14001:2004 ISO 9001:2008

ISO (International Organization for Standardization) is the world’s largest developer and publisher of International Standards.

ISO 14001 is an international environmental management system which assures our customers that they are buying products from a company that cares about the environment, enhances the company’s image and saves money.

The Global Quality Management System is recognized by ISO through registration by the Canadian General Standards Board (CGSB) to ISO 9001:2008. This standard defines quality requirements from the design and development phase through to testing and delivery to the customer.

The GREENGUARD mark means that a product has been tested using stringent environmental chamber methods and found to meet GREENGUARD’s Indoor Air Quality Standards. GREENGUARD Certified Products are low emitting and contribute minimal levels of pollutants to indoor environment.

What customers will look for in Certified Products:

VOC emissions vs. VOC content

Has the product been tested in the last 12 months?

Has the product been proven to emit acceptable levels of VOC’s and formaldehyde?

Is the product readily available?

Is the product competitively priced?

Has the product received independent third-party certification?

Buildings are LEED certified

Products are GREENGUARD certified

Global (Hospitality) has recently become the only furniture manufacture to-date to be certified under the hospitality’s Green Key program. Global products can now contribute to a hotels operating and sustainable ratings, helping them garner higher eco-ratings.

The Green Key Eco-Rating Program is a graduated rating system designed to recognize hotels, motels and resorts that are committed to improving their environmental and fiscal performance.

Based on the results of a comprehensive environmental self-assessment, hoteliers are awarded a 1-5 Green Key rating and provided with guidance on how to “unlock” opportunities to reduce environmental impacts and operating costs through reduced utility consumption, employee training, and supply chain management.
